

Digital Marketing Packages that require almost no work on your part and offer something no one else is promising — **12V Relevant Results!**

You're going to like
the way you look...
I guarantee it.

Projected results on a tier-based package system.

Unlike others that ask for your money with only hopes of success (what a gamble!), Angie works with an established super hero of 12-Volt Google Ads. We use a combination of Google Magic and common sense to provide a whole new level of confidence in spending those dollars.

Leverage learned targeting and "grow the pie" with display ads.

Market dominance is great, but if you're looking to "grow the pie" in your market and attract entirely new customers, then you'll want to lean into display ads powered by the successful practices learned through your Google Ads campaigns.

You know us. We're 12-Volt veterans and M.E.S.A. originals.

Unlike so many marketing firms out there that provide this type of service, Dirk Marketing is a proven winner with M.E.S.A., its Members, and Vendor Partners. You can rely on us – our experience in the industry, our ties to the group, and our personal reputation.
